

Congress needs to concentrate on laws that really do matter...not if XM can carry traffic reports for certain cities. I liken it to congress mandating toilets only flush 1.6 gallons and now we all have to flush 3 times instead of one time. That really protected us! What it did was to hurt and frustrate us all and it's high time that congress worried about things that really matter as to our everyday quality of life and not "pie-in-the-sky" stuff that really isn't any threat at all to the average American citizen. I do not think that XM carrying local traffic is going to put one local station out of business. If a person is loyal to that station and likes that station's format it will make no difference if XM also carries local news and traffic.
